Dear Bill,

Selkirk Direct-Temp™ venting system is now a listed and accepted venting system to be used on Kingsman (4/7") direct vent gas products, except for Kingsman model ZDV5245.

We will amend our manuals for this addition and you may post to your website and contact your customers. Be sure to mention that the ZDVDF A (Duravent Hard Pipe Adapter) must be used to connect the pipe to our sloped top flue fireplaces, and the ZDV DKA (Duravent Hard Pipe Adapter) must be used for our back flue fireplace and our freestanding stoves.

Sincerely,

Chris Green
